Hi Mike

This is a subset of the tables we sent ASLM on all Monuments (included NPS in original request).

You won't be able to view on iPhone due to the size of the table.

Please let me know if you want something more simplistic.

Hi Chris,

Sally asked me to send you this updated table. Please let us know if you need anything else!

I hope your day is going well!

Best,

Rachel

The ancient ruins within the monument with their breathtaking vistas and spectacular petroglyphs provide a link to the past offering insights into the lives of the peoples who once inhabited his part of the desert Southwest. The area's architectural features and artifacts are tangible objects that can help researchers reconstruct the human past. Such objects and more importantly the spatial relationships among them provide outstanding opportunities for archeologists to study the way humans interacted with one another neighboring groups and with the environment that sustained them in prehistoric times. BLM resources, objects an values are further defined through management plans and/or manager's reports. Including: Heritage Resources Cultural Resources Riparian Vegetation Upland Vegetation

BLM	Sonoran Desert National Monument Arizona	Phoenix 20	001 Antiquities Act	486 149.00		,10 000	January 17 2001: The Sonoran Desert National Monument is a magnificent example of untrammeled Sonoran desert Indiscape. The area encompasses a functioning desert exosystem with an extraordinary array of biological scientific and historic resources. The most biologically diverse of the North American deserts the monument consists of distinct mountain ranges separated by wide valleys and includes large square cactus forest communities that provide excellent habitat for a wide range of wildlife species. The monument's biological resource include a spectacular diversity of plant and animal species. BMI resources, objects and values are further defined through management plans and/or manager's reports. Including: Archeological and Historic Cresoste Bush-Bursage, Desert Grassland, and Washes Deversity Plant and Animal Species Functioning Desert Ecosystem Saguaro Cactus Sand Tank Mountains Scientific analysis of plant species and climate wildlife and plant species and climate wildlife.	
ВІМ	Vermilion Cliffs National Monument Arizona		000 Antiquities Act			14 121	November 9 2000: Amid the sandstone slickrock brilliant cliffs and rolling sandy plateaus of the Vermillion Cliffs National Monument lie outstanding objects of scientific and historic interest. Despite its arid climate and rugged isolation the monument contains a wide variety of biological objects and has a long and rich human history. Full of natural spiendor and a sense of solitude this area remains remote and unspoiled qualities that are essential to the protection of the scientific and historic objects it contains. The monument is a geological treasure. BLM resources, objects and values are further defined through management plans and/or manager's reports. Including: Cultural and Historic Resources Geology Paria River Vegetation Wilderness Wildliffe - Bighorn Sheep Wildliffe - Bighorn Sheep Wildliffe - Rountain Lion Wildliffe - Rountain Lion Wildliffe - Pronghorn Antelope Wildliffe - Pronghorn Antelope	
BIM/NPS	Grand Canyon- Parashant National Monument Arizona	St. George 20					January 11 2000: The Grand Canyon-Parashant National Monument is a vast biologically diverse impressive landscape encompassing an array of scientific and historic objects. This remote area of open undeveloped spaces and engaging scenery is located on the edge of one of the most beautiful places on earth the Grand Canyon. Despit the hardships created by rugged isolation and the lack of natural waters the monument has a long and rich human history spanning more than 11 000 years and an equa ly rich geologic history spanning almost 2 billion years. Full of natural splendor and a sense of solitude this area remains remote and unspoiled qualities that are essential to the protection of the scientific and historic resources it contains. BLM resources, objects and values are further defined through management plans and/or manager's reports. Including: Cave and Karst Resources Historic Resources Historic Resources Natural Resources Natural Resources Natural Resources Natural Resources Physical resources -Facilities	

BLM & US Forest ially Service		Ca ifornia	Ukiah	2015	Antiquities Act	330 780.00	0	July 10 2015: The Berryessa Snow Mountain area is the heart of northern California's wild Inner Coast Range. Once covered by occan waters it is a landscape shaped by geologic forces of staggering power overlain with bountful but fragile biodiversity. Anchored in the north by Snow Mountain's remote forests and in the south by scenic Berryessa Mountain this area stretches through unbroken wildlands and important wildlife corridors a mosaic of native grasslands picturesque oak woodlands rare wettands and wild chaparral. BLM resources, objects and values are further defined through management plans and/or manager's reports. Including: human history of the area, geology, plant and wildlife species, migratory bird corridor, native fisheries, scientific research, and other studies	
BLM	Santa Rosa and San Jacinto Mountains National Monument	Ca ifornia	Palm Springs	2000/2009	Congress	177 128.00	110 926	Biological Resources - Peninsular ranges bighorn sheep Biological Resources - Peninsular ranges bighorn sheep Cultural resource values Recreational resource values BLM resources, objects and values are further defined through management plans and/or manager's reports.	
BLM	Mojave Trails National Monument	Ca ifornia	Needles	2016	Antiquities Act	1 600 000.00	0	February 12 2016: The Mojave Trails area of southern California is a stunning mosaic of rugged mountain ranges ancient lava flows and spectacular sand dunes. It is a landscape defined by scarcity and shaped by travel. The area exemp flies the remarkable ecology of the Mojave Desert where the hearty insistence of life is scratched out from uncrelenting heat and dryness. This punishing environment has also forged the unique human history of the area from ancient settlements uproted by a changing climate to the armises of General George S. Patton Ir. as they trained for battle in North Africa. With historic American trading routes trails followed by Spanish explorers a transcontinental rail line and the Nation's most famous highway the Mojave Trails area tells the American story of exploration migration and commerce. The Mojave Trails area is an invaluable treasure and will continue to serve as an irreplaceable antional resource for geologists arcologists and historians for generations to come. BLM resources, objects and values are further defined through management plans and/or manager's reports. Including; geology paleontological resources springs and riparian areas. Rare plant species unique invertebrates and archaeological resources springs and riparian areas.	
ВІМ	Fort Ord National Monument	Ca ifornia	Marina	2012	Antiquities Act	14 651.00	0	April 20 2012: In the heart of California's Central Coast the former Fort Ord encompasses a sweeping landscape of vivid beauty and rich natural diversity. One of the few remaining expanses of large contiguous open space in the increasingly developed Monterey Bay area this area is a rolling landscape long treasured for recreation scientific research outdoor education and historical significance. Originating in the Plestocene Epoch ancient dunes provide the foundation for this landscape's unique array of plant and wildlife communities. The area is also notable for its historical significance including its role in the Spanish settlement of California and in the mi itary training of generations of American soldiers. Buff resources, objects and values are further defined through management plans and/or manager's reports. Including: Juan Batista de Anza NHT Military Heritage and History Plants, Flora, Graslands, and Oak Recreation and Tourism	
BLM	Carrizo Plain National Monument	Ca ifornia	Bakersfield	2001	Antiquities Act	204 107.00	35 772.00	Proclamation 7393 January 17 2001: Full of natural splendor and rich in human history the majestic grasslands and stark ridges in the Carrizo Plain National Monument contain exceptional objects of scientific and historic interest. Since the mid-1800s large portions of the grasslands that once spanned the entire four hundred mile expanse of California's nearby San Joaquin Valley and other valleys in the vicinity have been e liminated by extensive land conversion to agricultural industrial and urban land uses. The Carrizo Plain National Monument which is dramatically bisected by the San Andreas Fault zone is the largest undeveloped remanned of this ecosystem providing crucial habitat for the long-term conservation of the many endemic plant and animal species that still inhabit the area. Buth resources, objects and values are further defined through management plans and/or Giant knagraor rat San Joaquin antelope squirrel Blunt-nosed leopard mountain plover Long hom fairy shrimp Vernal pool fairy shrimp	
ВІМ	California Coastal National Monument	Ca ifornia	Marina	2000/2014/2017	Antiquities Act	3 937.00	0	Proclamation 7264 January 11 2000: The islands rocks and pinnacles of the California Coastal National Monument overwhelm the viewer as white-capped waves crash into the vertical cliffs or deeply crevassed surge channels and frothy water empties back into the ocean. Amids that beauty lies irreplaceable scientific values vital to protecting the fragile ecosystems of the California coastline. At land's end the islands rocks exposed reefs and pinnacles off the coast above mean high tide provide havens for significant populations of sea mammals and birds. They are part of a narrow and important flight lane in the Pacific Plyway providing essential habitat for feeding perching nesting and shelter. The California Coastal National Monument is a biological treasure. BLM resources, objects and values are further defined through management plans and/or manager's reports. Including: Cultural Resources - Pre European Educational Value - Interpretation Natural Resources - Marine mammals Recreational Value - Wildlife observation and coastal sight seeing Scientific Value - Research	

		Sand to Snow National Monument	Ca ifornia	Palm Springs	2016	Antiquities Act	154 000.00		0.00	February 12 2016: The Sand to Snow area of southern California is an ecological and cultural treasure a microcosm of the great geographic diversity of the region. Rising from the floor of the Sonoran Desert to the tallest peak in southern California the area features a remarkable diversity of plant and animal species. The area includes a portion of the San Bernardino National Forest and connects this area with Joshua Tree National Park to the east knitting tegether an ensoil of spectual raindscapes stretching over 200 m less. The mountain peaks of the Sand to Snow area frame the northeastern reach of Coachella Valley along with the Santa Rosa and San Jacinto Mountains National Monument to the south. Home to desert oases at Big Morongo Canyon and Whitewater Canyon the area serves as a refuelpe for desert dwelling animals and as stopwer for migrating birds. The archaeological riches of the Black tava Buttes and the historical remains of mining and ranching communities tell of past prosperity and struggle in this aird land. The unbroken expanse is an invaluable treasure for our Nation and will continue to serve as an irreplaceable resource for archaeological regeologists and biologists for generations to come. BLM resources objects and values are defined through management plans. BLM resources, objects and values are further defined through management plans and/or manager's reports. Including: human history of the area, geology, plant and wildlife species diversity, desert riparian habitats, threatened and endangered plant and animal species; recreational opportunities, scientific research, and other studies.	
		Canyons of the Ancients National Monument	Colorado	Dolores	2000	Antiquities Act	175 160 00		8 630	June 9 2000: Containing the highest known density of archaeological sites in the Nation the Canyons of the Ancients National Monument holds evidence of cultures and traditions spanning thousands of years. This area with its intertwined natural and cultural resources is a rugged landscape a quality that greatly contributes to the protection of its scientific and historic objects. The monument offers an upnaral ledel opportunity to observe study and experience how cultures lived and adapted over time in the American Southwest. BLM resources, objects and values are further defined through management plans and/or manager's reports. Including: Archeology Geology Raptors Reptiles	
Partiall	BLM & US Forest Service	Browns Canyon National	Colorado	Salida	2015		21 586.00		0	February 19 2015: In central Colorado's vibrant upper Arkansas River valley the rugged granite cliffs colorful rock outcroppings and stunning mountain vistas of Browns Canyon form an iconic landscape that attracts visitors from around the world. The landscape's canyons rivers and backcountry forests have provided a home for humans for over 10 000 years and the cultural and historical resources found in this landscape are a testament to the area's Native Peoples as well as the history of more recent settlers and mining communities. The area's unusual geology and roughly 3 000-foot range in elevation support a diversity of plants and wildlife including a significant herd of bighorn sheep. Browns Canyon harbors a wealth of scientifically significant geological ecological riparian cultural and historic resources and is an important area for studies of paleoecology mineralogy archaeology and climate change. BLM resources, objects and values are further defined through management plans and/or managers' reports. Including: Ecological Riparian Cultural and Historic Scientific	
	NPS/BLM/State/Priv	Craters of the Moon National								Redesignated a National Preserve in 2002 through 107th Congress. "WHEREAS there is located in townships one south one and two north ranges twenty-four and twenty-five east of the Boise Meridian in Butte and Blaine Counties Idaho an area which contains a remarkable fissure eruption together with its associated volcanic cones cratters rifts lava flows caves natural bridges and other phenomena characteristic of volcanic action which are of unusual scientific value and general interest; and WHEREAS this area contains many curious and unusual phenomena of great educational value and has a weird and scenic landscape peculiar to itself; and WHEREAS is appears that the public interest would be promoted by reserving these volcanic features as a National Monument and Preserve encompasses approximately 738 000 acres of BLM- and NPS-administered federal land 8 000 acres of service land. The decisions made through this planning process apply only to the federal land and 7000 acres of private land. The decisions made through this planning process apply only to the federal land within the Monument boundary referred to as "the planning area". On November 9 2000 Presidential Proclamation 7373 expanded Craters of the Moon National Monument from roughly 54 000 acres to approximately 753 000 acres including the 738 000 acres of federal land. The President signed this proclamation to ensure protection of the Great Rift volcanic rift zone and its associated features. The Proclamation also placed the lands under the administration of both the National Park Service (NPS) and the Bureau of Land Management (BLM) with each agency having primary management authority over separate portions. In addition on August 21 2002 Public Law (PL) 107-213 116 Statute [Stat.] 1052 designated the NPS portion of the expanded Monument as a National Preserve. While BLM and NPS operate under different laws regulations and policies which apply to different portions of the planning area the proposed plan provides a jointly developed framework for cooperative
